BIOSTATISTICAL CONSULTING INC.

PROGRAMMER ANALYST OR SENIOR PROGRAMMER ANALYST

Company: Biostatistical Consulting Inc. (BCI)

BCI provides biostatistical and programming services to the pharmaceutical, biotechnology, and medical device industries. Most of our work is in the design and analysis of clinical trials, although we can also design and analyze epidemiology studies and patient registries. BCI employs a select group of biostatisticians and statistical programmers, all of whom have advanced degrees and whose substantial experience spans Phase 1 to Phase 4 clinical trials and a broad range of therapeutic areas.

Location: Lexington, MA 02421

Position type: Full time employee

Qualifications:

Education: MS/MA in statistics, biostatistics, computer science, or similar discipline

Professional experience: Minimum of 3 years of SAS programming experience in pharmaceutical, biotechnology or medical device industries (including CROs) for Senior Programmer Analyst

Other requirements:

- Excellent knowledge of SAS
- Experience programming of tables, listings, and figures for clinical trials
- Experience with multiple therapeutic areas
- Ability to produce work of the highest quality
- Ability to work on multiple projects simultaneously
- Ability to meet timelines
- Ability to work well with project team and clients
- Attention to detail
- Excellent oral and written communication skills

BIOSTATISTICAL CONSULTING INC.

Responsibilities:

- Develop SAS programs to analyze clinical trial data and to produce tables, listings, and figures, typically for submission to FDA or European regulatory authority
- Develop SAS programs to validate programs to analyze clinical trial data and to produce tables, listings, and figures
- Develop SAS programs to produce or validate derived datasets
- Develop SAS programs to produce or validate tables, listings, and figures for ISE and ISS
- Produce documentation for SAS programs

Application: If interested, please send CV to info@biostatisticalconsulting.com.
