Tenure or Tenure-Track Open Rank Faculty Positions

Department of Statistics
Rutgers University-New Brunswick, School of Arts & Sciences

****

The Department of Statistics of Rutgers University seeks outstanding applicants for tenured/tenure track faculty positions to start in Fall 2023. Open-rank positions are at assistant professor/associate professor/full professor levels. Applicants must have a Ph.D. in statistics or a related field by September 1, 2023.

Responsibilities of the position include: teaching and supervising both undergraduate and graduate students, and conducting original research in statistics and data science broadly defined. Particular strength in statistical learning, fair and responsible data science, and related areas is preferred. The department particularly welcomes applicants who can contribute to a diverse and inclusive environment through their scholarship, teaching, mentoring, and professional services. Pursuit of external research funding is expected.

Interested individuals should apply online through http://jobs.rutgers.edu/postings/180246 by providing curriculum vitae, research statement, teaching statement, diversity and inclusion statement, and arranging for submission of at least three confidential letters of reference.

Review of applications will start on November 15, 2022, and continue until the positions are filled. Applicants are encouraged to submit their applications early.

Rutgers University is committed to invest significant resources in the development of data science as an interdisciplinary research and education field. One of the two positions is part of a larger cluster hire at Rutgers in the broadly defined area of fairness and responsible data science, with an interdisciplinary focus, and is supported by funds from the Rutgers Presidential Diversity Hiring Initiative. As such, the successful candidate is also expected to be an active participant in the cluster, including associated activities in Data Science research and education program development across the university. The university is also committed to Diversity, Equity and Inclusion. Broadening participation in Data Science and enhancing research on the social impact of Data Science are two of the major activities of the department and the university.
